

STEP-BY-STEP GUIDE TO PUSH A FILE TO GITHUB USING GIT

1. Open Git Bash

2. Create a new folder:

Bash:

```
mkdir GitDemo
```

```
cd GitDemo
```

3. Initialize Git:

Bash:

```
git init
```

4. Create a file:

Bash:

```
notepad++ welcome.txt
```

5. Stage the file for commit:

Bash:

```
git add welcome.txt
```

6. Commit it:

```
git commit -m "Initial commit"
```

7. Add remote origin

Bash:

```
git remote add origin https://github.com/GitDemo.git
```

8. push file

```
git push -u origin main
```
